### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species of fastening structures are as follows:

Species I, directed to the embodiment(s) shown in Figs. 1-5.

Species II, directed to the embodiment(s) shown in Fig. 6.

Species III, directed to the embodiment(s) shown in Fig. 7.

Species IV, directed to the embodiment(s) shown in Fig. 8.

Species V, directed to the embodiment(s) shown in Fig. 9.

In addition, a fastening member used for one of the above fastening structures must also be selected from that exemplified by 13 in figs. 1-9 or, alternatively, the fastening member 13 from fig. 10 or fig. 11.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3677

the election, applicant must indicate which are readable upon the elected species. MPEP

§ 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I: Claims 1-8, 10.

Species II: Claims 1-2, 9.

Species III: Claims 1-2, 11.

Species IV: Claims 1-2, 12.

Species V: Claims 1-2, 11, 13-14.

Then, depending on the fastening member chosen (a fastening member used for one of the above fastening structures must also be selected from that exemplified by 13 in figs. 1-9 or, alternatively, the fastening member 13 from fig. 10 or fig. 11), a selection of claims 15-16; 15, 17; 15, 18; 15, 19; or solely the fastening member from claim 1 may be chosen.

The following claim(s) appear to be generic: Claims 1-2.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: As described in the applicant's specification, there are five embodiments, each of the five embodiments possessing different technical features such as the concave portion of the flange portion; the outer diameter of the projecting portion being larger than a bore diameter of the hole of the second member; and leading end of the tubular projection portion not projecting from an other surface of the second member being examples of such differing technical features within the various embodiments.

A telephone call was made to Nancy Kong on 6/8/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 3677

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID C. REESE whose telephone number is (571)272-7082. The examiner can normally be reached on 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Victor Batson can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
